

### **Increases Safety**

- Reduces likelihood of mid-air collisions and birdstrikes

### **Saves Money**

- Triples normal lamp life
- Quick & simple installation

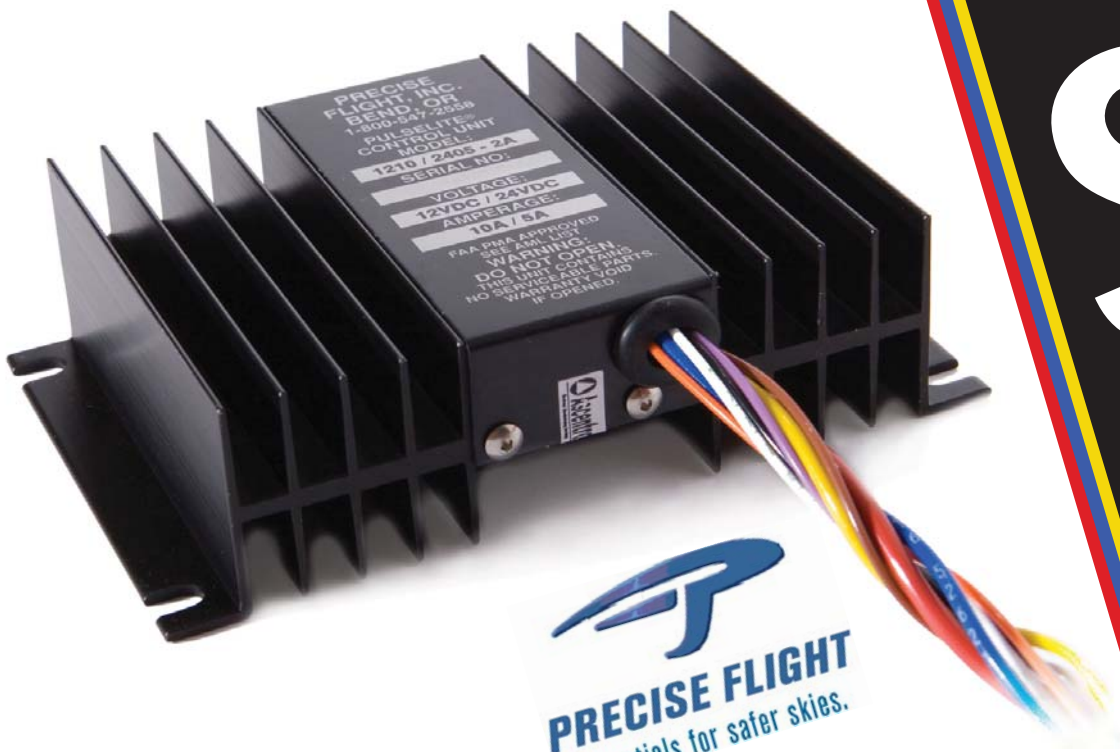

### **Certified For Most Aircraft**

- FAA approved and STC'd for virtually all corporate, general aviation, rotorcraft and commercial aircraft. The Pulselite is installed on over 20,000 aircraft worldwide.

Pulselite alternately flashes existing landing, taxi and recognition lights 45 times per minute in a pattern that dramatically increases the visibility of an aircraft. With Pulselite, the aircraft becomes visible for miles, even in fog or smog.

# Be Seen.
